Overview:

Edging the Colorado/Utah border and cradled in the shadow of the Experience Palisade rock formation, Gateway Canyons is the world's first and only discovery resort, created to nourish guests' curiosity through the art of discovery and adventure within a naturally intriguing environment.

Just steps away from one of the highest concentrations of dinosaur fossils on the planet, Gateway Canyons Resort – part of the Noble House Hotels & Resorts collection – is a place where the earth opens up to tell its story, inviting guests to explore the wonders of the natural world while delighting in luxury accommodations and once in a lifetime experiences.

With more than 6,000 acres of natural splendor to explore at its most primitive state – including one of only locations in the world where Precambrian rock is still visible by the human eye, guests temporarily pause the mass mayhem of their lives, take a deep breath of fresh air and become inspired by a sense of wonderment – while posing their most simple questions and appreciating a quiet authenticity to make their own discoveries.

Whether spending an evening discovering the galaxies, nebulae and star clusters under one of the darkest night skies on the planet, or an afternoon taking a Bentley Supersport through the scenic rural byways of the American West, the resort awaits travelers ready to awaken their adventurous spirit.

Gateway Canyons Resort & Spa has received numerous awards and accolades from the travel industry's most prominent publications. In 2017, the resort was ranked in Travel + Leisure's World's Best Awards as number 3 in the 10 Best Resort Hotels in the West category, number 52 in the Top 100 Hotels in the World category, and number 11 in the Top 15 Resort Hotels in the Continental United States category.
